

Printing elements using a struct keyword in c

```
#include<stdio.h>
struct student
{
    char name[30];
    int age;
    float weight;
    char gender[10];
};
void main()
{ struct student sdata;
  printf("enter name: ");
  scanf("%s",sdata.name);
  printf("enter age: ");
  scanf("%d",&sdata.age);
  printf("enter weight: ");
  scanf("%f",&sdata.weight);
  printf("enter gender: ");
  scanf("%s",sdata.gender);
  printf("Detail of student: \n");
  printf("Name: %s \nAge: %d \nWeight:
%.2f\ngender: %s",sdata.name,sdata.a
ge,sdata.weight,sdata.gender);
}
```
